

SMARTBRIDGE / SKILL WALLET

AI Technologies & Development Accelerators Log

Date: 2 July 2026	Team ID: —
Project Name: Caption AI : AI Powered Social Media Caption Generator	

AI Tools Used

Documenting the specific artificial intelligence tools and platforms utilized during your project lifecycle helps evaluate efficiency and technological integration. Detail each AI tool, how it was applied, and the tangible benefit it provided to your workflow or final product.

S.No	Tool / Platform Name	Specific Use Case / Application	Project Phase Applied	Impact / Benefit
1	Gemini 1.5 Pro	Generated minimalist Flask app.py backend boilerplate code and engineered strict regex sanitization handlers to parse clean context payloads.	Development Phase	Accelerated the initial API route structure setup and input validation pipeline standup by roughly 40%.
2	v0 by Vercel	Generated responsive dark-themed glassmorphism workspace web templates, animated background text-input glowing container cards, and chip elements layout configurations.	Design & Frontend Phase	Eliminated hours of manual CSS flexbox adjustments and guaranteed structural layout consistency across mobile viewports.
3	Groq Platform Node		Testing & Core Integration	

S.No	Tool / Platform Name	Specific Use Case / Application	Project Phase Applied	Impact / Benefit
		Leveraged the Llama-3.3-70b-versatile cloud pipeline execution layers to synthesize rapid text assist content categories over secure endpoint tunnels.		Secured an ultra-low inference latency profile hitting 1850 ms generation benchmarks without running resource-heavy operations locally.
