Problem-Solution Fit Matrix

Date: 2 July 2026

Team ID: —

Project Name: Caption AI : AI Powered Social Media Caption Generator

Problem-Solution Fit Canvas

Use the framework below to ensure your proposed solution accurately addresses the root causes, behaviors, and limitations of your target audience. Fill out the canvas in the respective boxes just like the original visual template.

1. CUSTOMER SEGMENT(S) [CS] • Social media managers handling multiple accounts. • Independent creators, freelancers, and brand leads.	6. CUSTOMER LIMITATIONS [CL] • Budget: Zero funding for premium enterprise software layouts. • Devices: Limited to web browser workspace interfaces.	5. AVAILABLE SOLUTIONS [AS] • Manual Writing: High control but heavy hours overhead. • Generic Templates: Fast but lacks unique custom brand voices.
2. PROBLEMS/PAINS + FREQUENCY [PR] • Pain: Writing original text variants daily across channels is exhausting. • Frequency: Multiple times per day with every campaign block deployment.	9. PROBLEM ROOT / CAUSE [RC] • Each profile requires custom hashtags, style bounds, and character sizes. • Lack of centralized copywriting assistant engines natively inside the local setup.	7. BEHAVIOR + INTENSITY [BE] • Behavior: Keeps open drafts across massive scratchpads. • Intensity: Severe frustration causing campaign deployment lag.
3. TRIGGERS TO ACT [TR] • Sudden drops in community engagement numbers.	10. YOUR SOLUTION [SL]	8. CHANNELS OF BEHAVIOR [CH] • Online: Social feed feeds, local workspace browsers.

- Tight marketing deployment schedules piling up with unwritten description frames.

Caption AI Engine:

A lightweight browser control panel linked to Flask micro-routers and fast Groq Cloud inference pipelines, parsing custom visual instructions into ready-to-copy text in under 2.5 seconds.

- **Offline:** Manual marketing strategy ideation sessions.
